

**ABSTRACT**

A composition for dyeing keratinous fibers, in particular human keratinous fibers, such as human hair, containing, in a medium suitable for dyeing:

- as oxidation base, at least one compound of formula (I) below:

in which:

- $R_1$  is a hydrogen atom, an alkyl radical, an aryl radical, a heterocycle radical, or a halogen atom,
- $R_2$  is a hydrogen atom, an alkyl radical, a hydroxyalkyl radical, or an aminoalkyl radical,
- $Z_a$ ,  $Z_b$  and  $Z_c$  are independently a nitrogen atom or a carbon carrying an  $R_3$  or  $R_4$  radical with meanings identical to those of  $R_1$ ; wherein at least one of  $Z_a$ ,  $Z_b$  and  $Z_c$  is a nitrogen atom; it being possible for  $R_3$  and  $R_4$  to form between themselves a substituted or unsubstituted aromatic ring.
